

# Nessie

## The Loch Ness Map:

The Loch Ness is in Highlands (Scotland), south west of Inverness. It's higher.

## Who is Nessie?

Nessie is very long: 5 meters! He has a long neck. Some people saw fur on the animal, but it is not proved. Unfortunately, the pictures don't prove all opinions.

Scientists think about a mammal. Even though they don't know the truth.

## The legend:

Nessie was first seen by an Irish monk, in the 6<sup>th</sup> century.

But...The legend of Nessie was born in 1933 with the first picture taken by Mr. Wilson.

The picture represents Nessie's head and neck. It's a famous picture. (see at the top)

When he died, he confessed he was lying!

A lot of pictures and videos exist but we can see they are fake.

# Do we believe in Nessie?

After a lot of thinking.....

 **Yes, because...**

↔ There are a many pictures of Nessie.

 **No, because...**

↔ Many pictures are fake!

↔ A dinosaur was found dead but there are certainly a lot of unknown creatures.

↔ There are not many appearances of Nessie.

**And you, do you believe in Nessie?  
Give your opinion!**
