

## APPLIQUE INSTRUCTIONS

Embroider as usual up to the applique part of the design.

There are 4 steps for applique:

1. Placement line: stitch this step to see where the applique material will be placed.
2. Spray a piece of material with temporary spray glue and position over the placement line.
3. Stitch now the Cutting line
4. Take the hoop out of the machine (NOT the material out of the hoop!!) and use applique scissors to cut the applique material close to the cutting line. Careful not to snip the cutting line.

Continue with the design to the end. If there are more than one applique piece in the design, the steps will be the same.
