**INNOVATIONS  
ON THE T/v.  
C. COLOMBO**

The Italian Line, faithful to its tradition always to offer the best possible service to its clientele, has introduced several important innovations on the "Cristoforo Colombo", that have rendered the vessel as modern and comfortable as her sister ship "Leonardo da Vinci":

- An up-to-date plant of anti-rolling stabilizers, ensuring full stability to the ship under any weather condition.
- Private facilities in 100% of the First Class and Cabin Class accommodations, and in the majority of the Tourist Class cabins.
- The First Class Ball Room has been enlarged to the full breadth of the ship, thus doubling its surface. A lovely supplementary bar is attached to the Ball Room, and together they constitute an imposing, very elegant ensemble.
- A Children's Verandah is now available in the Tourist Class.
- The furnishings of the Tourist Class Ball Room and Pool Verandah have been renovated.

With such innovations, the "Cristoforo Colombo" and the "Leonardo da Vinci", the largest stabilizer-equipped liners in the Mediterranean, will be a homogeneous, perfect couple plying between the Mediterranean and New York, well deserving its fine reputation and the predilection of the international clientele. The refined hospitality offered by these ships, their warm, congenial atmosphere, the ever-increasing efficiency of their equipment and service are quite a confirmation, today like yesterday, of the Italian Line's proud motto "A GREAT TRADITION AT YOUR SERVICE".
