

# Do you watch a lot of films on your computer?

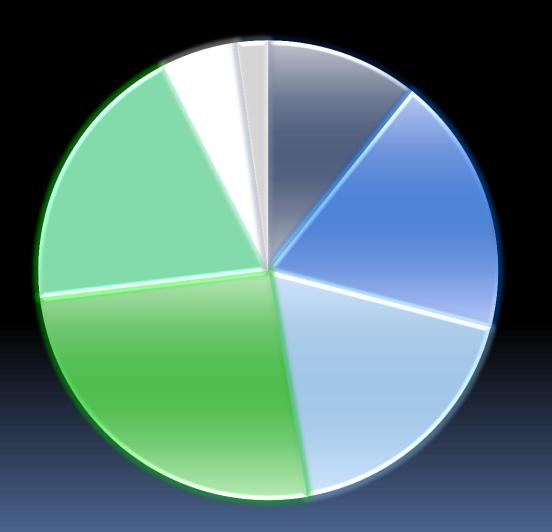

How often do you listen to music on your computer, mp3 player or smartphone?

#### To watch films, do you...

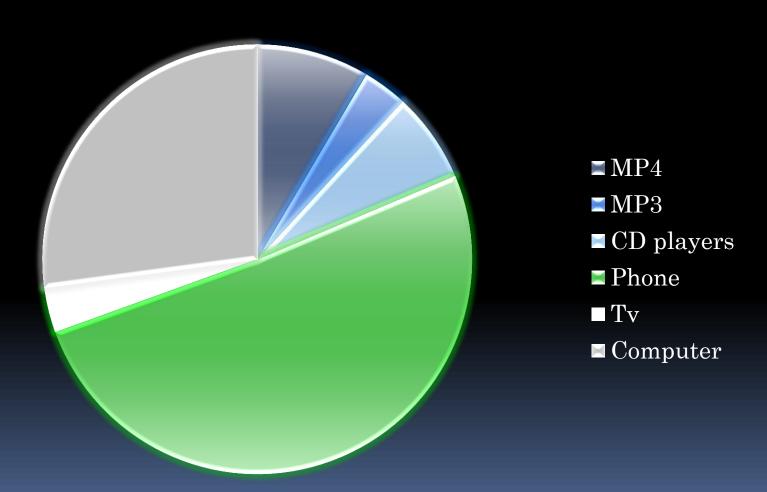

### For music, do you...

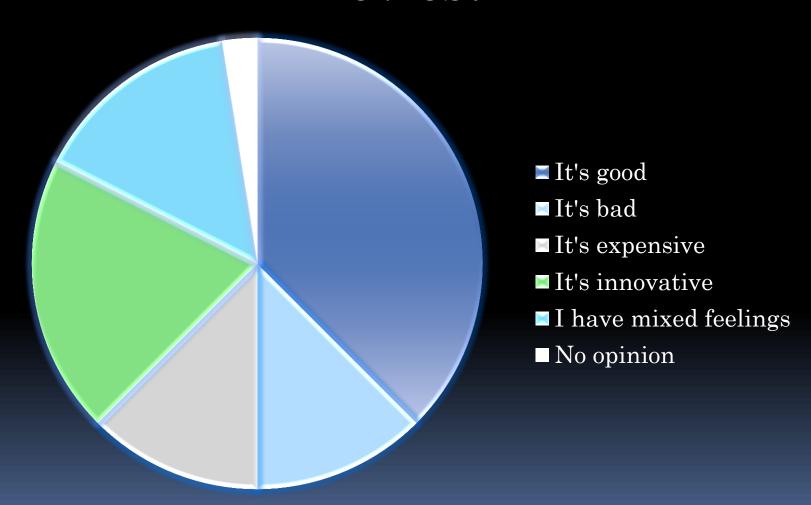

- Buy CDs in shops
- Download legally
- Download illegally
- Listen on music websites
- Listen to the radio
- Watch Tv
- **■** Other

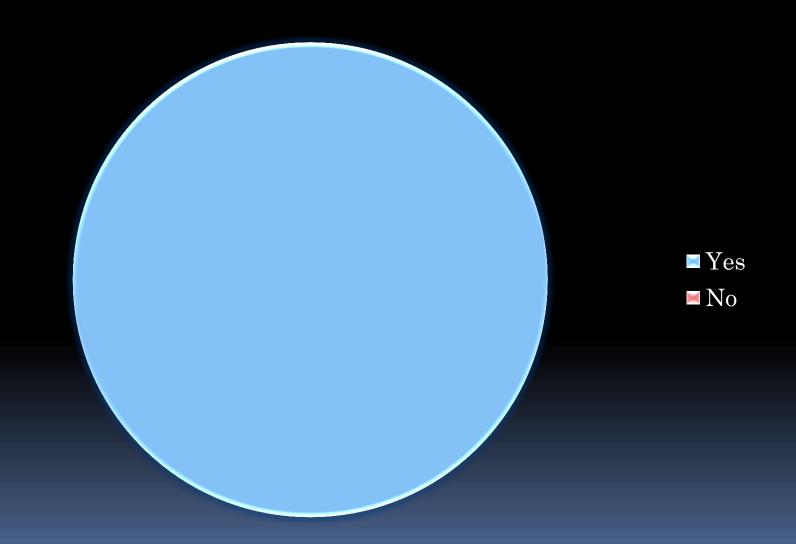

## Which device do you use to listen to music?

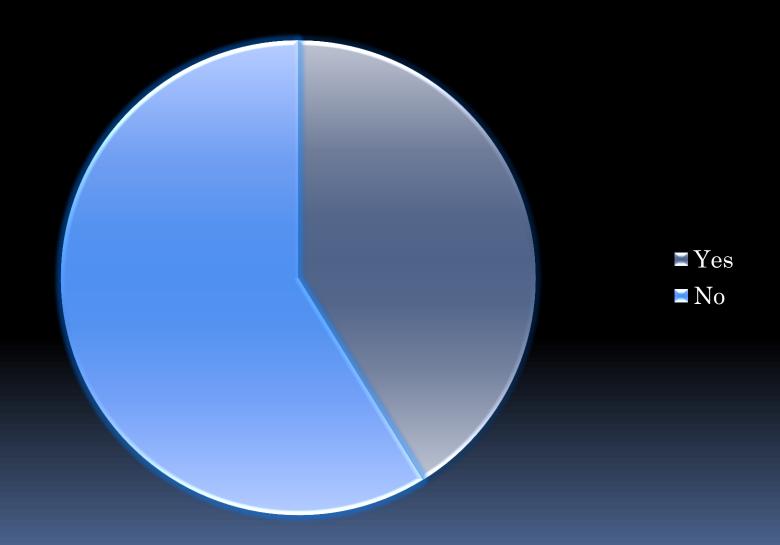

## What do you think about 3D movies?

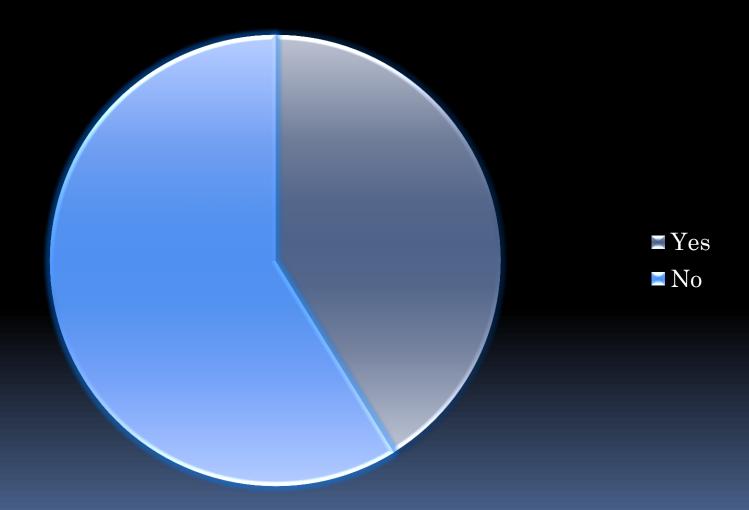

### Have you ever downloaded?

### Do you know what 4D films are?

# To protect artists, must illegal downloading be punished?

#### How?

- **■** Fine
- ■Internet cut-down
- Community service

#### Conclusion

- We first asked if people watched a lot of films on computer. 71% of respondents answered they did.
- Secondly, we interviewed people who claimed that 3D movies were good and innovative but 12,5% of teens thought that they were bad and expensive.
- As for 4D films, less than half of respondents don't know what they are.
- Concerning the music, we asked: How often do you listen to music and how? The major part listens to music frequently or always with, usually, a phone and a computer. We didn't expect the young to use MP4 so much.

• Then, this opinion pool reveals that a lot of people go to the cinema, download illegally, use TV and use streaming to watch films.

And, to listen to music, a lot of people download legally or illegally, listen on music websites or listen to the radio.

For both, it is worth noticing that only 10% buy CD's or DVD's. This make us aware that CDs or DVDs could disappear.

- So we asked if they had ever downloaded. It comes as no surprise that everybody said yes.
- It raises a problem: should we punish illegal downloading or not to protect artists? More than half of the young claimed that it was not necessary to protect them. The rest of people think the best punishment would be community service.
