

Our Poll focuses on

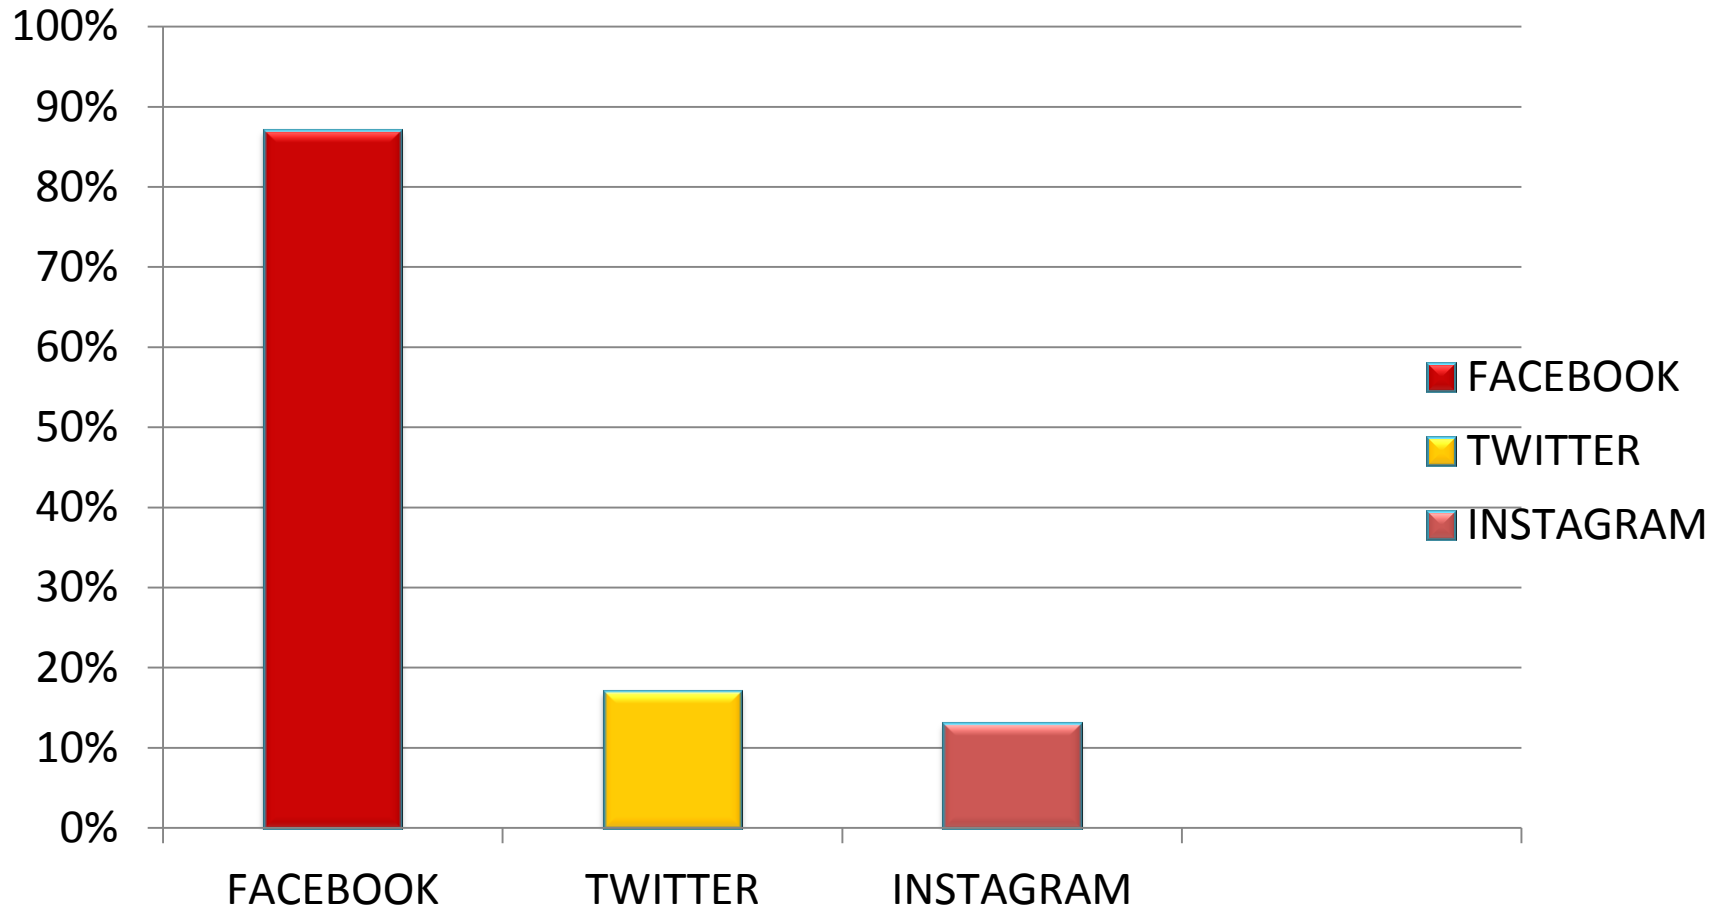

Social Networks !

- We Worked on ITs and we chose 10 questions about social networks and teenagers. 33 persons between 15 to 17 years old, answered our questions. 90 % of them are on a social network. In our second question ,we asked them about the social networks they used; most of them are on Facebook and a few are on twitter, Skype, Instagram. Then 40% of them claimed that they checked their account once or twice a day. 89% of them said that they were members of social networks to keep in touch with their friends. This reveals that teenagers are attached to their friends on social networks. As regard cyberbullying , 5 of them claimed that they had been the witnesses of cyberbullying and 3 of them had been victims of that. This makes us aware the good and bad aspects of social networks.

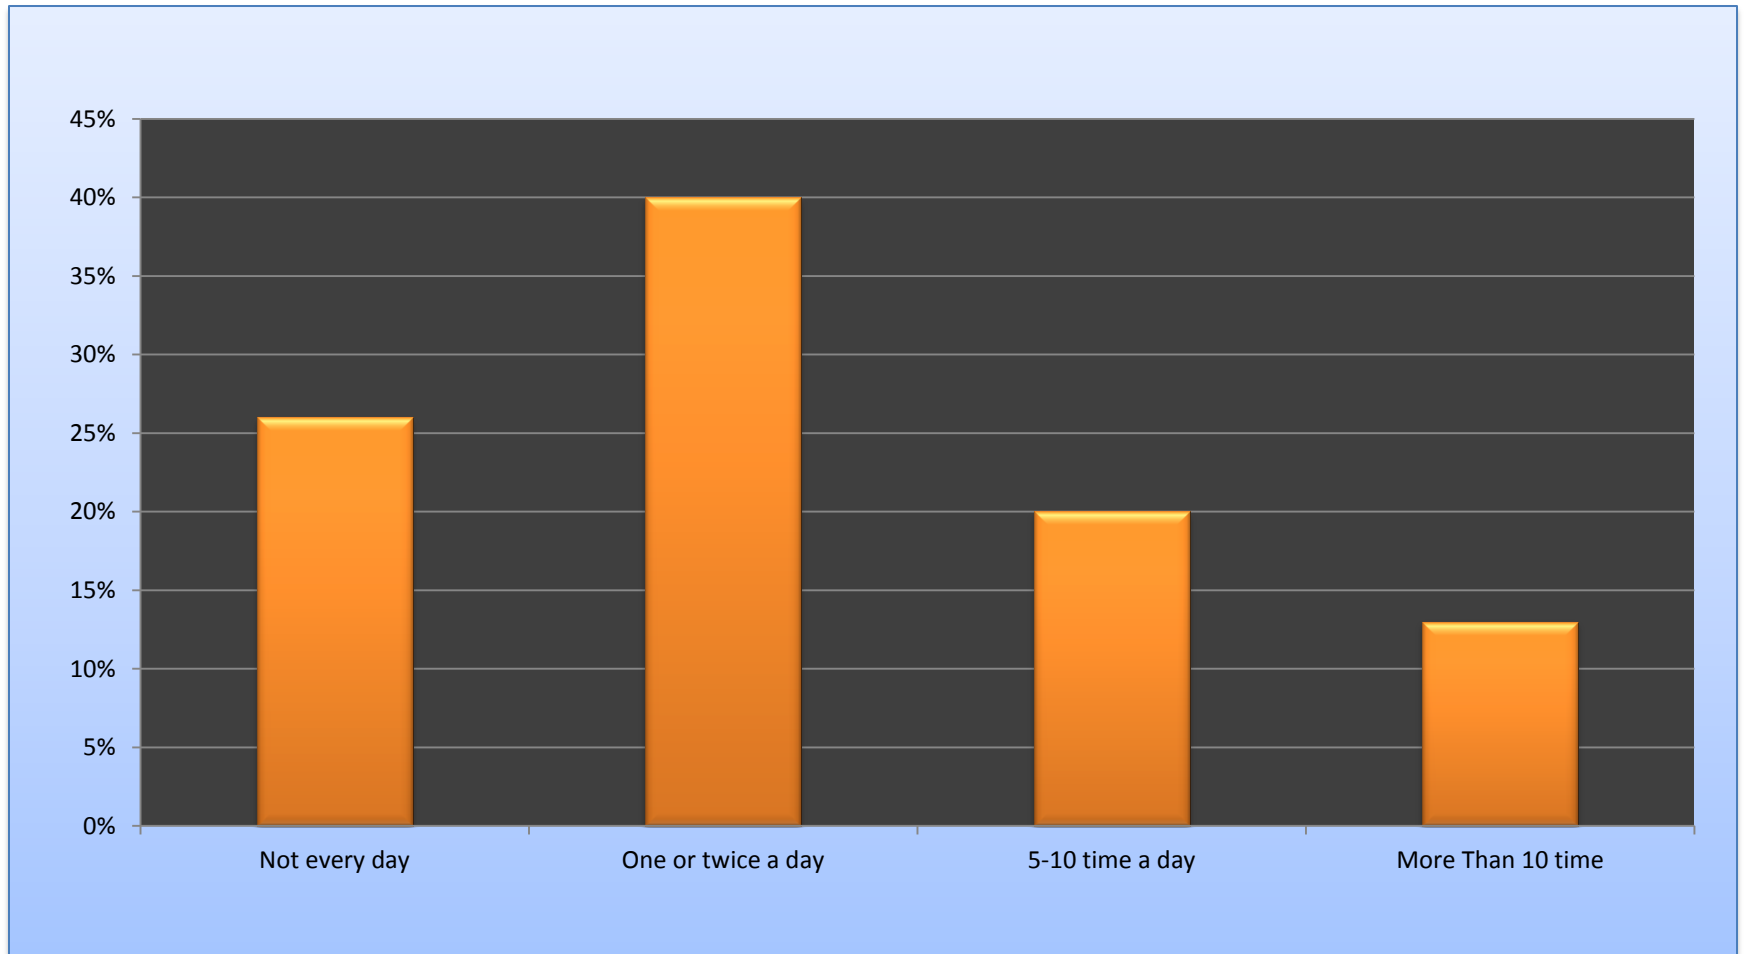

Member of a Social Network?

Which Social Network?

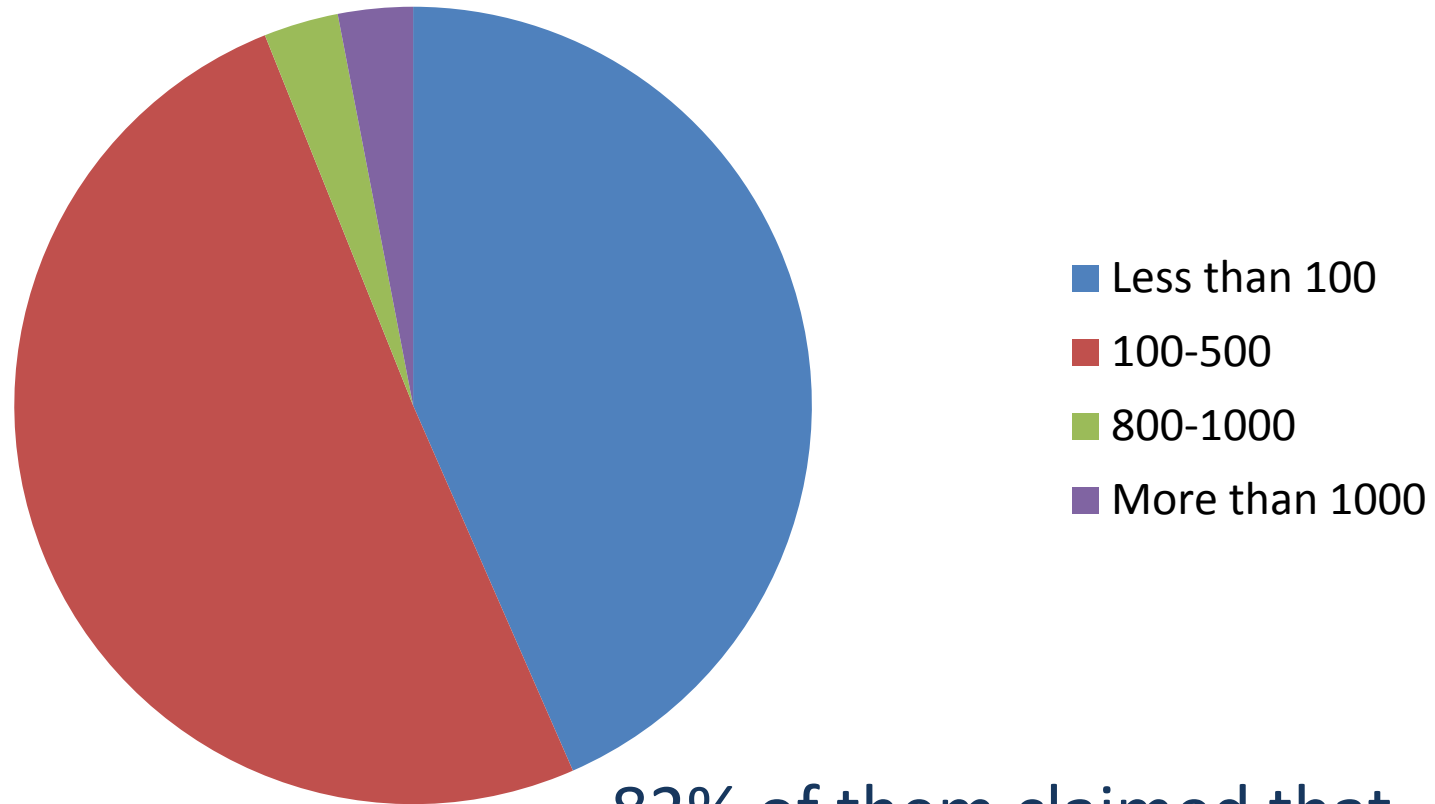

How often?

How Many friends?

Ventes

82% of them claimed that they know all of their friends on Social network
