

ITs and addiction

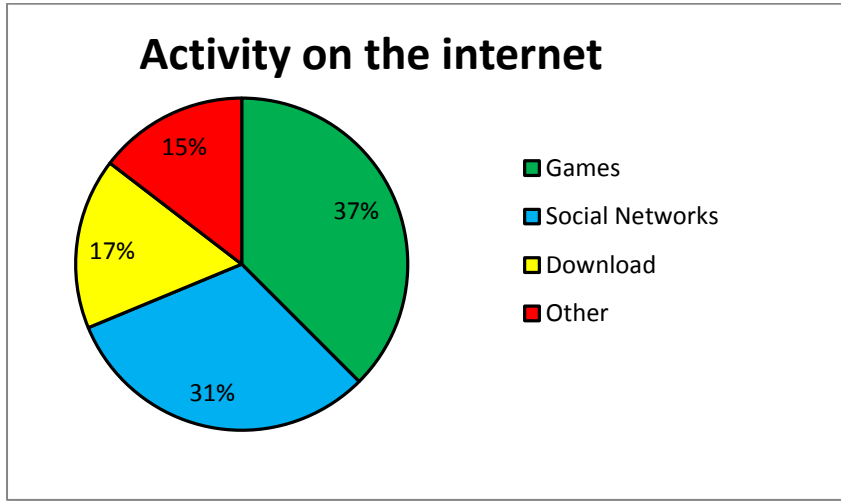

1) Do you have internet at home ?

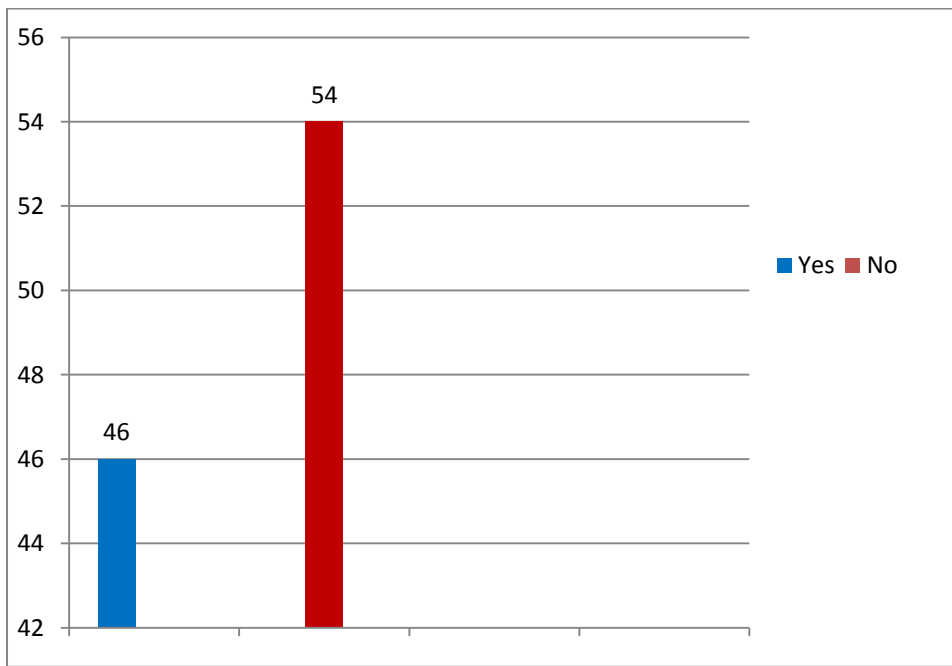

2) If you do, on average, how long do you spend on the internet a day ?

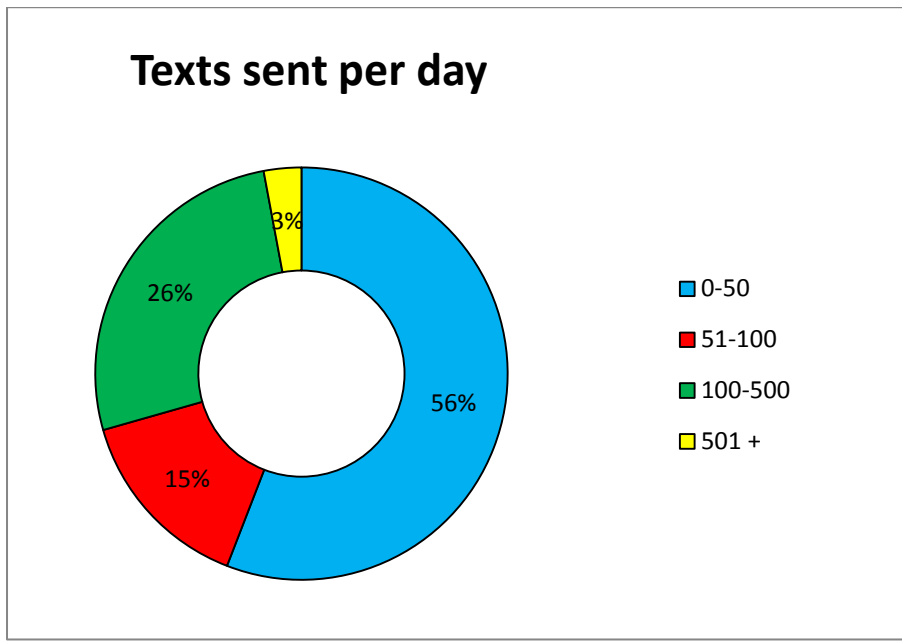

3) What do you do the most on the internet ?

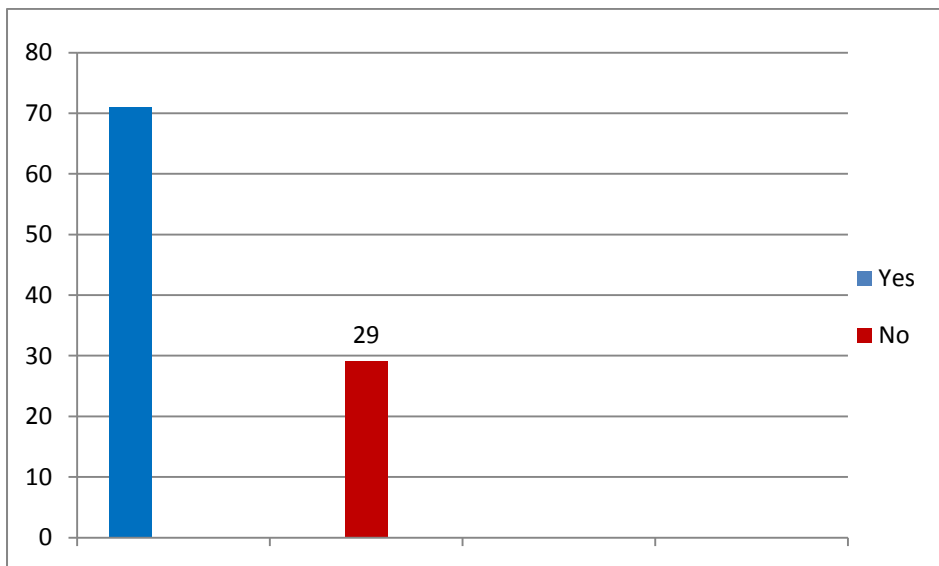

4) Have you ever used your phone in class ?

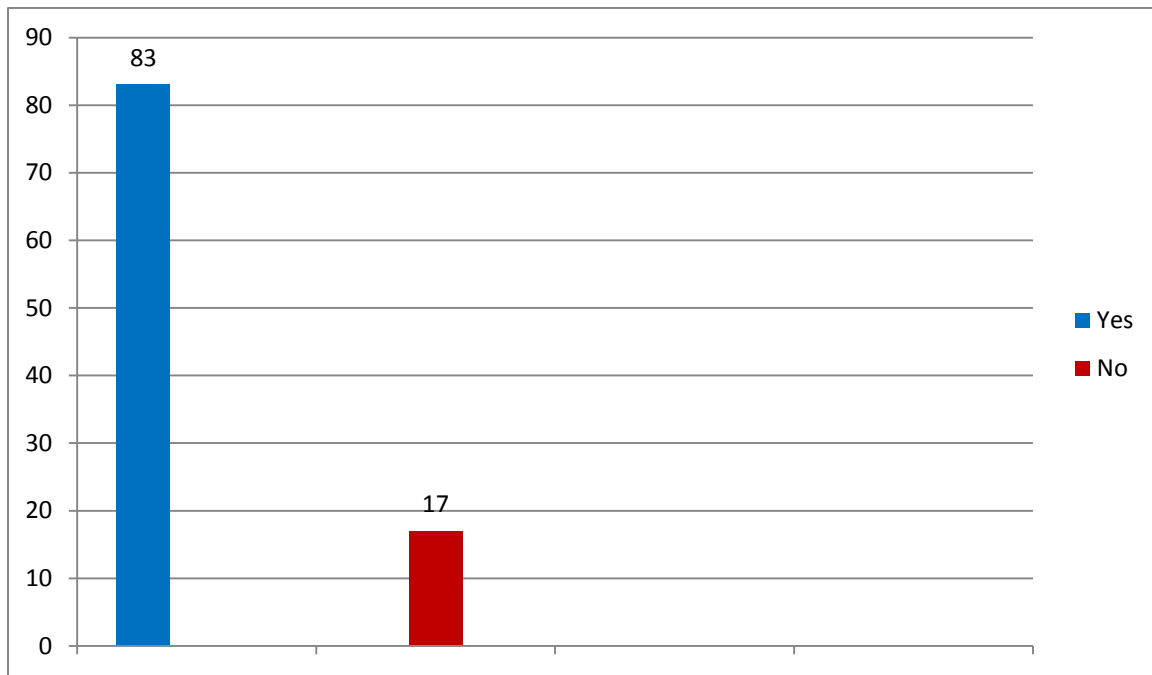

5) How many texts do you send a day ?

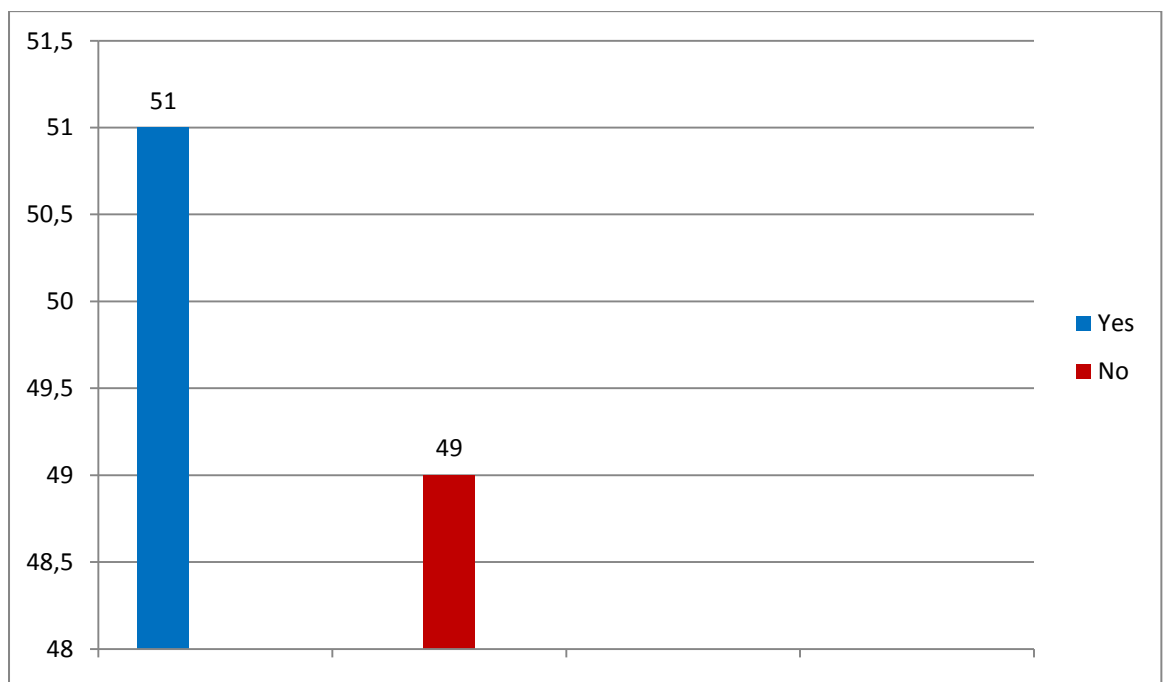

6) Can you spend a day without technologies ?

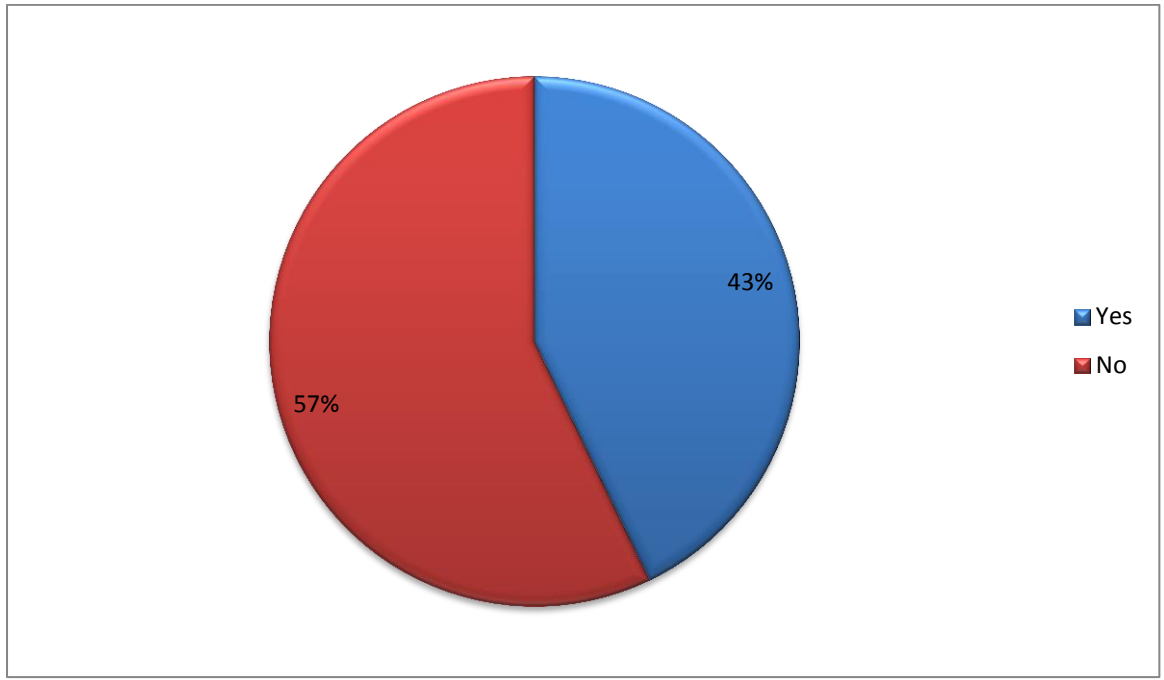

7) Do you think that school is more important than ITs ?

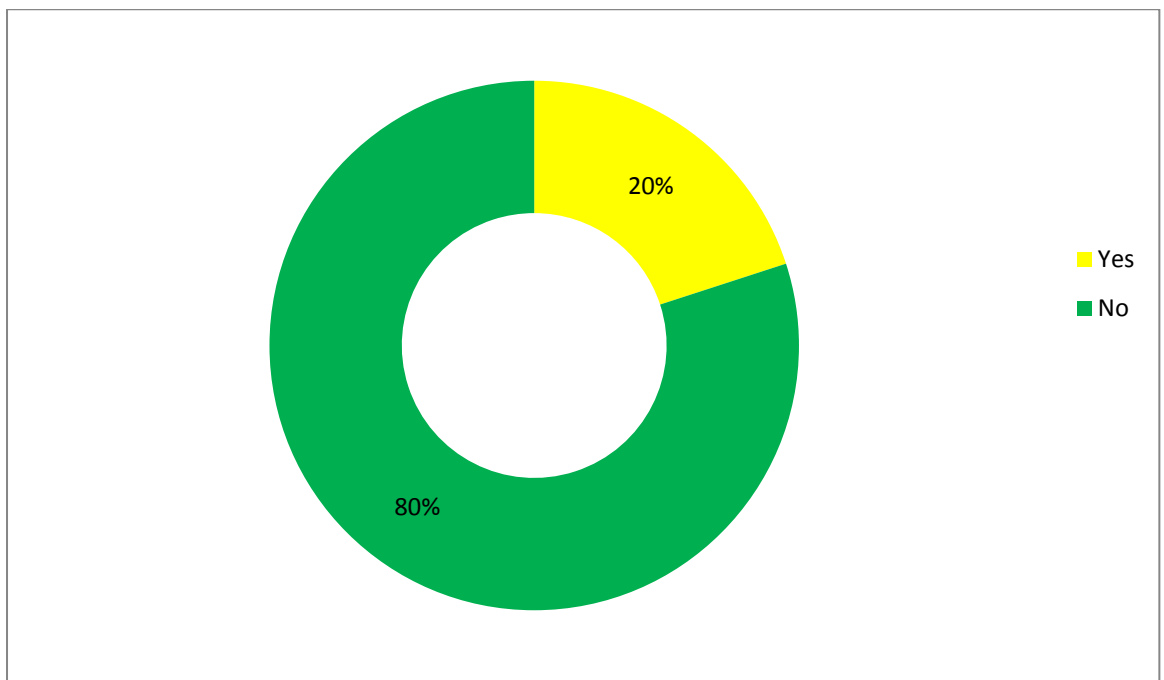

8) Do you log on to social network everyday?

9) Do you sleep with your phone on ?

10) When you play video games, do you forget about your real life ?

RECAP

We first asked the respondents how long they spent on the internet everyday: 51 % of respondents answered that they spent between 4H and 6H a day on the internet.

Our second question was : « What do you do the most on the internet ? » 38% of people asked declared that they played video games on the internet; however 31% of students explained that they preferred going on social networks .

Another question : « How many texts do you send a day ? »
We didn't expect the young to say that they sent between 0 and 100 texts a day!

We asked them if they could spend a day without new technologies.
It is worth noticing that 71% of respondents answered they could.

The last question was : « When you play video games, do you forget about your real life ? »
80% of people explained that they didn't forget about their real life.
