

Jérôme Ferrier

Retired from TotalEnergies in 2018 after 42 years in the Company.

Honorary President of IGU (International Gas Union) since 2015.

Chairman of GMD (Gaz Méditerranée Développement)

Member of experts committee in SWEN Capital Partners, an asset manager in private equity since 2019.

Senior Advisor of FTI, a global business advisory and management consulting firm, since 2021.

Graduated in civil engineering (1974) and petroleum engineering (1975)

He joined Elf Aquitaine, the French state owned oil & gas company in 1976 and worked as drilling and production engineer in the giant Lacq gas field in the South West of France.

In 1981 he moved to Congo in Africa to become production engineer on the offshore petroleum fields with Elf Congo.

In 1984 he joined the natural gas division at Elf's Head Office in Paris to negotiate new LNG projects to be developed in Australia, Cameroun and Nigeria.

In 1987 he joined the Department France in the natural gas division as Deputy Head of Department, then Head of Department in 1991, and Head of Southern Europe Division in 1994.

In 1998 he became CEO of Gaz du Sud-Ouest (GSO) subsidiary of Elf Aquitaine and Gaz de France in charge of gas purchasing, transportation, storage and commercialisation representing one fifth of total gas consumption in France.

Following the merger of Elf Aquitaine and Total in 2000, he became in 2002 Senior Vice-President for the Americas of Total Gas & Power, to develop gas & power activities in North and South America.

In 2005, he became Managing Director of Total Gas & Power for the Southern Cone (Argentina, Bolivia, Brazil and Chile) and Total Group Representative for Argentina, based in Buenos Aires.

From 2008 to 2013, he was Senior Vice-President for Corporate Security Total.

In September 2008, he was elected by the International Gas Union (IGU) Executive Council as IGU President for the triennium 2012-2015, becoming Vice-President for the triennium 2009-2012.

He was Chairman and President of the French Gas Association for two mandates from 2013 to 2017, covering natural gas, LPG and LNG activities.

In 2018, he founded Gaz Méditerranée Développement (GMD), a consultancy firm to promote and develop LNG bunkering for ships requiring LNG as marine fuel.
