

After a lifetime's involvement with Aston Martin cars, their owners and the AMOC, I consider myself to be a valuable candidate for the Chairman of the Club who would like to progress the Club's new growth.

I have previously held the positions of Area Representative, a Committee of Management Director, Chairman of the Social Committee and, whilst on the Concours Committee, played an essential role in improving judging standards over the last 20 years. During that time, I have had the pleasure of helping to create and oversee some of the most incredible National and overseas events the Club has organised in the last decade.

My knowledge and understanding of leading a business and of how the Club operates, means I have the necessary skill set to meet the needs of the Membership both present and in the future. I would work closely with all HQ staff, Sub-Committees, Overseas Sections and the AMHT to create a unified and positive team around the world.

Aston Martin now produce more cars than ever before in their history and my objective over the next 3 years will be to create a platform for those owners to enjoy their cars and maximise their ownership experience.
