For me, art is a sort of expression that someone creates for to involve a reaction from have a reaction of his public (like a thought reflexion, feelings, ~~etc~~, etc). It's also something which plays with sensations: music/sound, painting/view, texture we can touch...

Art is when a creative mind puts an effort into making something that will involve emotions within in other people. Every spirit mind is different but all of them every mind can feel emotions when looking at art. Everyone can possibly create art and everyone can appreciate it, as well.
