

## Stuffed Christmas Tree Ornaments

1. Hoop a 9x9 piece of material (I used a linen fabric) in a 5x5 hoop. Embroider your design as you usually would except for the outline of the design.

2. Take the hoop out the machine, but do not take the design out of the hoop. Glue a 10" piece of ribbon to the top back of the design. Take a second piece of 9x9 material and put it on the back side of your design.

**3.** Put the hoop back in the machine making sure the back 9x9 piece of material is centered on the back of the hoop and finish embroidering the design.

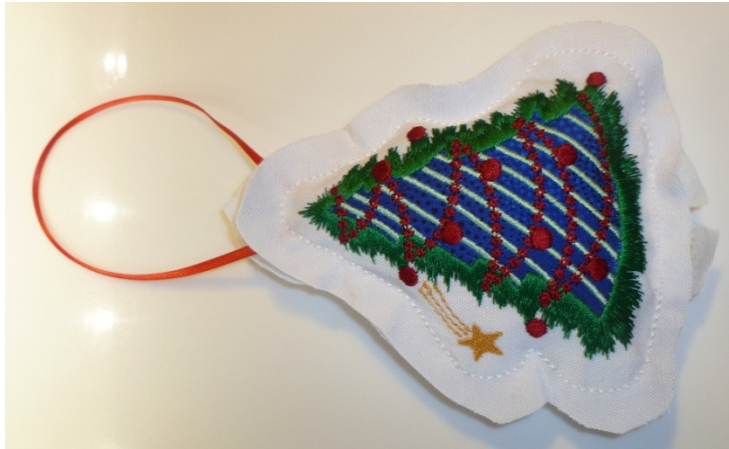

**4.** Take the design out of the hoop and use the opening on the bottom to stuff the design. After you have stuffed it, use sewing machine or hand sew the opening on the bottom of the ornament closed.

5. Cut about 3/8" from the design outline and tear out the stabilizer from between the two pieces of fabric.

6. Cut around the 3/8" seam as shown in the picture below.

7. Fray the seam, creating the fringe all the way around your design.

Your Christmas ornament is done.
