Corona Strategies in Sweden

You letter dated 8 July 2020

Dear Dr Tallinger,

Thank you for your letter to our leadership in the Corona Situation in Sweden. Please allow me to answer on their behalf.

We would like to acknowledge the receipt of your concerns, and we appreciate your sharing of those with the WMA. The WMA is receiving and collecting reports about the responses to the COVID-19 Pandemic from all parts of the world, resembling very different approaches and strategies that have been taken to handle an always challenging situation. Likewise, and for nearly all of them, we are receiving very different opinions on those strategies and measures that have been taken. Sweden is no exception.

The WMA is neither mandated nor equipped to be an investigative body. Still, we will continue to monitor the situation within the scope of our mission to sharpen our ethical guidelines and recommendations.

Thank you once again for sharing your observations.

Sincerely

Dr Otmar Kloiber
Secretary General
