

Mettre deux fractions sous le même dénominateur:

Méthode 1

et

Avec

1 - Je cherche dans les tables une multiplication dans laquelle je retrouve les dénominateurs des deux fractions:

$$\square = \square \times \square$$

4 = 2 x 2	32 = 4 x 8	63 = 7 x 9
6 = 2 x 3	33 = 3 x 11	64 = 8 x 8
8 = 2 x 4	35 = 7 x 5	66 = 6 x 11
9 = 3 x 3	36 = 4 x 9	70 = 7 x 10
10 = 2 x 5	36 = 6 x 6	72 = 9 x 8
12 = 2 x 6	36 = 3 x 12	72 = 6 x 12
12 = 3 x 4	40 = 4 x 10	77 = 7 x 11
14 = 2 x 7	40 = 5 x 8	80 = 8 x 10
15 = 3 x 5	42 = 6 x 7	81 = 9 x 9
16 = 2 x 8	44 = 4 x 11	84 = 7 x 12
16 = 4 x 4	45 = 5 x 9	88 = 8 x 11
18 = 3 x 6	48 = 6 x 8	90 = 9 x 10
18 = 2 x 9	48 = 4 x 12	96 = 8 x 12
20 = 2 x 10	50 = 5 x 10	99 = 9 x 11
20 = 5 x 4	54 = 6 x 9	100 = 10 x 10
21 = 3 x 7	55 = 5 x 11	108 = 9 x 12
22 = 2 x 11	56 = 7 x 8	110 = 11 x 10
24 = 2 x 12	60 = 6 x 10	120 = 12 x 10
24 = 3 x 8	60 = 5 x 12	121 = 11 x 11
24 = 6 x 4		132 = 11 x 12
25 = 5 x 5		144 = 12 x 12
28 = 4 x 7		
30 = 3 x 10		
30 = 6 x 5		

2 - Je calcule:

$$\frac{\square}{\square} = \frac{\square \times \square}{\square \times \square} = \frac{\dots}{\dots}$$
